Frontend Developer and Automation Specialist experienced in building responsive web applications, e-commerce solutions, and API-driven tools. Skilled in React, Next.js, Vite, Tailwind CSS, JavaScript, Shopify, n8n, Make, Zapier, GoHighLevel (GHL), and Python. Focused on building clean user interfaces, integrating services, and automating repetitive processes to improve efficiency.

TECHNICAL SKILLS

Frontend: React, Next.js, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, DaisyUI

E-Commerce: Shopify, E-Commerce Development, Product Management, Online Store Setup

Automation & CRM: n8n, Make, Zapier, GoHighLevel (GHL), API Integration, Python Automation

Other: Data Processing, File Management, System Monitoring, UI/UX Design, Developer Tooling

WORK EXPERIENCE

Freelance Developer | Remote / San Fernando, Pampanga | June 2025 – Present

- Designed and deployed responsive web applications using React, Vite, Tailwind CSS, and DaisyUI.
- Built n8n automation workflows connecting APIs, automating content publishing, and streamlining task management.
- Created Python automation scripts for data processing, file management, and system monitoring.

PROJECTS

Automated Content Pipeline | 2025

- Built a multi-stage automation pipeline connecting 5+ APIs to process, optimize, and distribute digital content.
- Reduced manual content processing time by 70% through automated workflow execution.
- Implemented error handling and notification systems to improve workflow reliability.

Selah's Clothing — Web-Based E-Commerce Management System | Capstone Project

- Developed a web-based e-commerce system concept for product presentation, online purchasing, inventory management, and transaction processing.
- Designed system functionality around the client's need to centralize sales, customer, inventory, product, and reseller-related operations.
- Planned support for online payments and cash on delivery, automated receipts, inventory monitoring, and reseller management.
